

101 Chair

CNC Ready

Parametric Design

101 Chair

CNC Ready

The whole project was done with digital fabrication in mind. The vectors for CNC milling come out of the grasshopper scrip ready for fabrication.

101 Chair

Parametric Design

The project was done entirely parametric inside Rhino+Grasshopper.
All the dimensions and features are controlled through the code.
The grasshopper script is capable of great diversity and automatically generates the 3D model and vector lines for CNC milling.
